Summary

I am a PhD with a robust understanding of molecular phylogenetics with particular focus on species delimitation and DNA barcoding. I have published 40 peer reviewed papers, whereof 21 first author publications (including three single-authored), mainly focussing on species delimitation. I have published on a range of different taxa, from annelid worms to birds, and fungi, and I have described eight new taxa. I have an extensive teaching record with over 1700 hours experience in 15 different undergraduate courses. I take pride in finishing projects on time.
